News Tracker Application

Problem Statement

Reading news on the go without any hassles while travelling is not possible with a physical newspaper and is considered a nuisance to readers and fellow traveller's. To read news in such a way that we don't have to worry about ever buying physical newspapers or carrying it when needed. Something which should fit in the palm of readers hands and be able to it carry everywhere, access from everywhere,this is possible only in digital, such as an Application hosted on the internet which could be accessed from any device that is connected to the Internet. Like smartphones and tablets which is now considered a necessary accessory when travelling.

Question	Description
Who does the problem affect?	Avid news readers.
What are the boundaries of the problem?	Daily news industries and news readers.
What is the issue?	Print media are old fashioned in this digital era. They cost money to buy, can easily be damaged, limited amount of information, not flexible to modifications, poor quality. Print media can restrict the information feed for readers.
When does this issue occur?	Readers prefer a single platform for their news feeds. Print media restricts the information because of the limitation in pages.
Where is the issue occuring?	The issue occurs when readers try to access news feeds when travelling. Accessing information is restricted through the usage of physical newspapers in the digital era.

Why is it important that we fix this problem?	It is important to fix this problem because everything in our day to day life is more digitalized. It is preferred to access information from anywhere. Valid and authentic News is difficult to get. Thus a authorized source of resource is highly valued.
